

Efficient cargo handling

FOR PORTS & TERMINALS

WE PROVIDE CARGO HANDLERS FOR PORTS & TERMINALS.

OUR PRODUCTS ARE CHARACTERIZED BY HIGH EFFICIENCY, FAST PERFORMANCE, FAULTLESS RELIABILITY, HIGH MACHINE AVAILABILITY AND A LONG LOW-COST WORKING LIFE. THE PRODUCTS ARE BUILT OF MOSTLY STANDARD, TRIED-AND-TESTED, ULTRA-RELIABLE CATERPILLAR COMPONENTS ENHANCED WITH OUR OWN APPLICATION-SPECIFIC AND INNOVATIVE SOLUTIONS.

MULTIDOCKER GETS THE JOB DONE. AND WE LISTEN TO OUR CUSTOMERS. WE THINK BIG BY THINKING OF THE SMALL THINGS, THE LITTLE TOUCHES THAT MAKE ALL THE DIFFERENCE. WE CAN MAKE YOUR MULTIDOCKER WORK JUST THE WAY YOU WANT IT TO, TO DO YOUR JOB. WE NEVER FORGET THAT THE WAY TO MAKE OUR BUSINESS BETTER IS TO MAKE YOUR BUSINESS BETTER.

MultiDocker®

Why choose MultiDocker?

- Specialized in ports and terminals - 30 years experience
- Scrap, waste, loose bulk and forest product applications
- World leading in customization for individual needs and efficient logistics through our unique modularized manufacturing system
- World class service and maintenance through the Caterpillar Dealer Network. Partnership with Caterpillar since 1998 and the major European Caterpillar dealers since 2008.
- Premium quality diesel and electrical powered machines

Guiding stars

"Performance"

- means high productivity. We believe high productivity is achieved by an efficient cargo handler with maximum uptime. A strong, fast and easily maneuverable cargo handler, reliable Caterpillar components and a well-organized service supplier makes the MultiDocker products just that - highly productive!

"Operators comfort"

- the operator should be able to operate the cargo handler to its maximum in a safe and comfortable environment. In order to do that, the cabin environment must be highly developed; for example the cabin needs to be stable, comfortable and the control system must allow the operator to feel like the cargo handler is like an extension of his own arms.

"Economy"

- the performance and the operators comfort added together equals "economy". We strive to make our customers' overall economy as competitive as possible and to do so we also offer advantageous financing solutions and the Caterpillar certified rebuild program.

Products

MultiDocker serves all regions of the world and customers with different needs so we build many different configurations of hydraulic cargo handlers. Our Sales representative and Cat dealer in your area has exact machine specifications available to help you choose what best meets your needs.

The machinery part of the MultiDocker products are produced by Caterpillar in Gosselies, Belgium. They deliver the "body" to our production partners in northern Europe where the machine is modified and supplemented by undercarriage, front end and a cabin solution, all according to the customers' need. Our "plug and play" method is efficient, cost-effective and facilitates convenient transportation to customers worldwide.

<p>CH1400</p> <p>Reach: 23,1-28 meters Engine output: 391 kW Lifting capacity: 22,4 tonnes Weight: 115-130 tonnes Base machine: CAT 385F</p>	<p>CH1100</p> <p>Reach: 21,4-24,8 meters Engine output: 355 kW Lifting capacity: 17,7 tonnes Weight: 87-99 tonnes Base machine: CAT 374F</p>	<p>CH900 - wheel based</p> <p>Reach: 18-24 meters Engine output: 355 kW Lifting capacity: 17,7 tonnes Weight: 78 tonnes Base machine: CAT 374F</p>
